EDUCATION

Georgia State University, J. Mack Robinson College of Business

Bachelor of Finance and Investment

2020 – 2024

- **Relevant Coursework:** Corporate Finance, Financial Statement Analysis, Financial Modeling & Valuation, Capital Markets.

EXPERIENCE

MCDR — Misr for Central Clearing, Depository and Registry

Cairo, Egypt

Financial Analyst

November 2024 – Present

Egypt's central securities depository (CSD) and post-trade infrastructure operator for the Egyptian Exchange (EGX), regulated by FRA.

- Valued EGX-listed companies through detailed DCF and 3-statement models, presented the investment cases to the CFO, and recommended which opportunities the firm should pursue.
- Built valuation models across comparable-company and precedent-transaction frameworks — the same frameworks used in sell-side M&A valuation and pitchbook work.
- Analyzed company financial statements under EAS and IFRS — revenue drivers, margins, cash conversion, and earnings quality — to separate businesses that can sustain their numbers from those that only look cheap.
- Screened EGX sectors for new investment ideas, building the shortlist of names that earned a full valuation.
- Tracked the firm's investment portfolio against EGX, CBE, and FRA regulatory thresholds — the listing-rules and disclosure fluency that ECM/DCM execution runs on.

VALUATION & TRANSACTION MODELING PROJECTS

Equity Valuation & 3-Statement Models — EGX, Tadawul, US & UK (Public & Private)

- Built full 3-statement models and DCF valuations from scratch for fourteen EGX-listed companies across nine sectors, with NAV/RNAV added for the real-estate developer — Misr Fertilizers (MFPC.CA), Talaat Moustafa Group (TMGH.CA), Elsewedy Electric (SWDY.CA), Fawry (FWRY.CA), Telecom Egypt (ETEL.CA), and Edita Food Industries (EFID.CA), among others.
- Extended the Misr Fertilizers (MFPC.CA) model into a full transaction analysis — trading comps, precedent transactions, and accretion/dilution on a hypothetical MOPCO–Abu Qir Fertilizers combination — concluding the deal is dilutive across all scenarios in Egypt's 20%+ rate environment.
- Applied the same from-scratch approach beyond the EGX — Almarai (2280.SR), Qassim Cement (3040.SR), Elm (7203.SR), and Jarir (4190.SR) on Saudi Tadawul, Apple (AAPL) on NASDAQ, and Iceland Foods Limited, a private UK company valued via normalized EBITDA, trading and transaction comps, and a DLOM to a football-field EV of £850m–£1.0bn — recalibrating to each market.
- Carried each model through to a fair value, a price target, and a buy/hold/sell call against the prevailing market price.

Multi-Method Valuation Engine

- Built a valuation tool that runs DCF, comps, DDM, DuPont, EVA, and Altman/Piotroski scoring on any EGX name and outputs a one-page valuation summary.

M&A Modeling Engine

- Designed an end-to-end M&A model — merger math, LBO, accretion/dilution, synergies, and fairness opinion — with rates and accounting treatment (EAS) set to the Egyptian market.

3-Statement Financial Model Engine

- Created the reusable 5-year 3-statement template (IFRS/EAS) that underpins every company model, with base/bull/bear scenarios and market-calibrated interest schedules.

CERTIFICATIONS

- **CFA Institute** — CFA Level I Candidate
- **Wall Street Prep** — Financial & Valuation Modeling Certification (FMVC) | 2026
- **Corporate Finance Institute** — Financial Modeling & Valuation Analyst (FMVA) | 2025

TECHNICAL SKILLS

Financial Modeling: 3-Statement Modeling, DCF, LBO, Comparable Company Analysis, Precedent Transactions, Merger Model, Accretion/Dilution, Pitch Books, Information Memorandums, Due Diligence

Valuation & Analysis: WACC, Terminal Value, IRR / NPV, Sensitivity & Scenario Analysis, Relative Valuation, NAV/RNAV, Dividend Discount Model

Tools: Bloomberg Terminal, Capital IQ, Microsoft Excel (Advanced), PowerPoint, Python
